

What is claimed is:

1. A structure comprising:  
a coiled wire supporting a covering which is attached to the wire to define an interior tunnel-like passageway, the coiled loop and the covering having a first end  
5 and a second end; and  
a plush toy attached to the covering.
2. The structure of claim 1, wherein the first end defines an opening.
- 10 3. The structure of claim 1, further comprising a first tie member provided at the first end, and a second tie member provided at the second end.
4. The structure of claim 1, further comprising an angled floor provided in the passageway adjacent the second end, and an opening provided in the covering  
15 adjacent the second opening and the angled floor.
5. A structure comprising:  
a coiled wire supporting a covering which is attached to the wire to define an interior tunnel-like passageway, the coiled loop and the covering having a first end  
20 and a second end; and  
an electronic device attached to the covering.
6. The structure of claim 5, further comprising a first tie member provided at the first end, and a second tie member provided at the second end.  
25
7. The structure of claim 5, further including a lid hingedly coupled to the first end.
8. The structure of claim 5, further including at least one appendage  
30 attached to the covering.
9. The structure of claim 5, further including a sleeve that is attached to the covering, the sleeve retaining the wire.

10. The structure of claim 9, further including another electronic device attached to the sleeve.

5 11. The structure of claim 9, further including an electrical line retained inside the sleeve and coupled to the electronic device.

12. The structure of claim 5, further including a power supply coupled to the electronic device.

10 13. The structure of claim 12, further including a switch coupled to the power supply and the electronic device.
